- Spotlight feature
- Image Bank >500 images

### Video & Screen Tools

- Video Device (input from webcam /video device)
- Screen Capture (region or screen)
- Screen Recording (from video device or entire screen)
- Journal of saved images/recordings

## Interactive lessons at the touch of a finger!

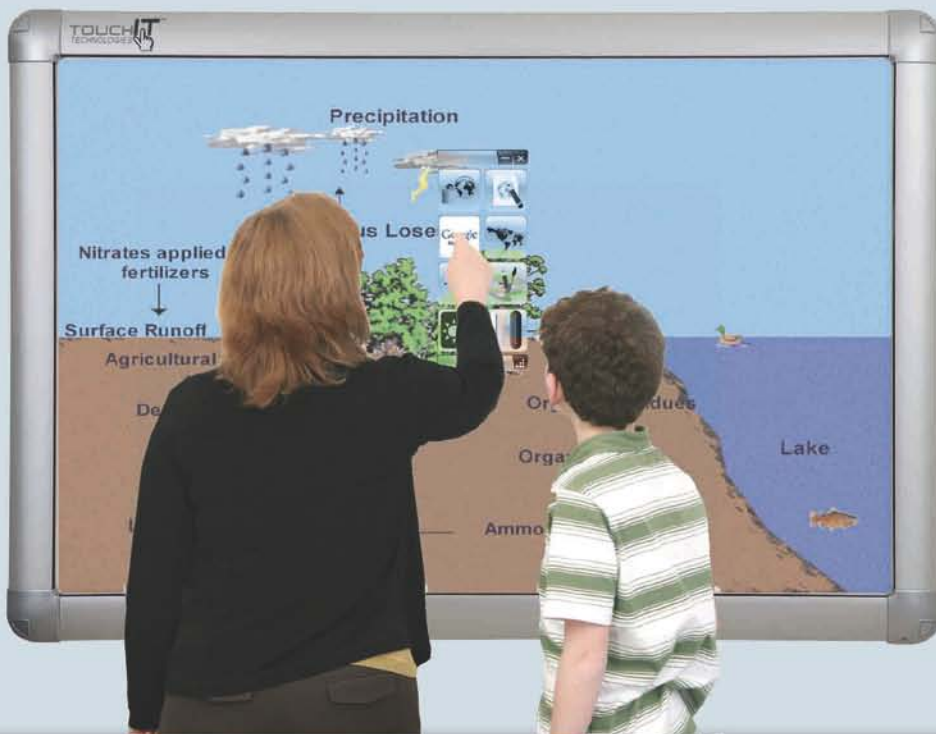

Wizteach is a state of the art interactive education software suite organized into toolbars allowing the teacher easy access to subject specific tools at the touch of a finger.

Our cross-curricular toolbars offer a plethora of subject specific as well as general tools, which can really bring a lesson to life. Choose to display as few or as many of the tools as you wish – the choice is yours. Our toolbars float over any application which means you are not confined to a traditional page layout, let the whole computer screen be your canvas.

Work directly on a document or perhaps directly on a webpage – our tools allow you to annotate, and explain you point without having to switch between applications. Wizteach tools can work independently or are a great addition to our TouchIT Transcribe annotation software.

Did we mention that Wizteach is available in 32 languages and this number is growing all the time?

Visit [www.touchittechnologies.com](http://www.touchittechnologies.com) for more information

### Math Games

- Arithmetic Game
- Speedy Sums
- Math Lines
- Number Balls

- Mixup
- Scramble

## The Toolbars

Currently, we have 10 toolbars on offer that are organized into three categories, Standard Tools, Maths Tools and Literacy Tools.

Each of these categories offers the teacher a different experience and specific cross-curricular tools that can help expand teaching concepts.

Wizreach tools can even be used live on the internet, you can annotate, draw and explain a concept whilst working directly in the browser rather than being confined to a specific piece of software or working area.
