

TouchIT Vote
Audience Response System

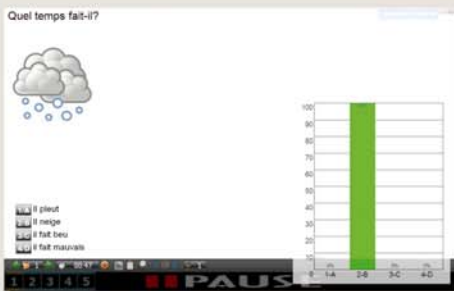

Audience Response System

INTERACT IN REAL-TIME WITH YOUR CLASS OR AUDIENCE

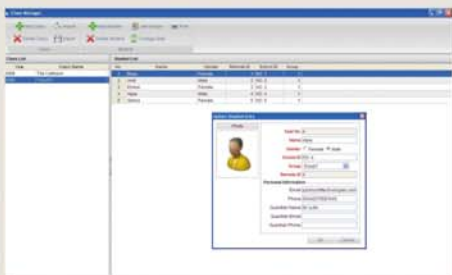

Software Screenshots

Stand alone editor to create activities without the need for a Microsoft Office Installation.

The activity screen allows you instant feedback. You can see who has the correct answer, view a scoreboard, who is yet to answer a question, all from the one screen. You are also able to pause the activity and navigate through your questions.

The integrated class manager allows you to assign handsets to all of your groups or classes. This enables performance to be tracked through the reporting tools. Want to work anonymously? You can do this too - no problem!

TouchIT Vote™ - Audience Response System

TouchIT Vote™ audience response system allows audiences and students to participate in presentations or classes by responding in real-time to questions using the TouchIT Handset.

Questions can be created in Powerpoint® or in our standalone editor. Presentations become a great way of collecting real-time data through 'question and answer' slides; the results of which can all be saved in our reporting software for deeper analysis at a later date. The flexibility to be able to create activities without having to own Microsoft PowerPoint is a real benefit. The stand alone editor gives you all the tools you require to create content rich audience or class driven activities.

Our range of question types give you the diversity to target the answers and feedback you require from your class or audience. Do you want general anonymous responses - no problem! Looking for a 'fastest finger first' response - the choice is yours!

TouchIT Vote™ gives you the ability of real-time assessment and feedback through a simple and intuitive user interface. With a powerful reporting tool you can get the answers YOU require from your activities.

- Integrated PowerPoint Toolbar

TouchIT Vote Integrates seamlessly into Microsoft PowerPoint. Convert your PowerPoint presentations quickly and easily into whole-class teaching activities.

Don't own Microsoft PowerPoint? We provide our own stand alone editor where you can create activities.

TouchIT Vote Software

SIMPLE AND EASY TO USE, POWERFUL REPORTING TOOL

Key Benefits

EDUCATION

- Progressive and continuous method of monitoring assessment for every individual in a class.
- Powerful reporting software allows you to analyse the feedback and responses received from the students.
- Allow teachers to make informed lesson choices driven from received and recorded student feedback
- Promote whole class participation in interactive activities
- Increase interaction between a teacher and the pupils
- Receive immediate responses and feedback from an activity
- Anonymous responses can be a great way of getting real feedback from the class during an activity
- Easily integrate the use of the TouchIT Vote ARS into your existing classes using PowerPoint*

CORPORATE TRAINING

- Immediate audience involvement and participation.
- Promotes interpersonal and communication skills through interaction
- Increase presentation effectiveness with continuous personal development through interactive feedback.
- Quickly and effectively produce reports from feedback on a topic or presentation.
- Incorporate the TouchIT Vote™ into your in-house training and assessment program.
- Gain vital anonymous feedback where personal opinions may be restrictive to a task.

TouchIT Vote - Running an Activity

Running an activity is quick and easy in TouchIT Vote. Simply select your class, choose your activity type from the seven options available, and launch your session. PowerPoint presentations, quick QA sessions, even group marking exercises are possible with TouchIT Vote.

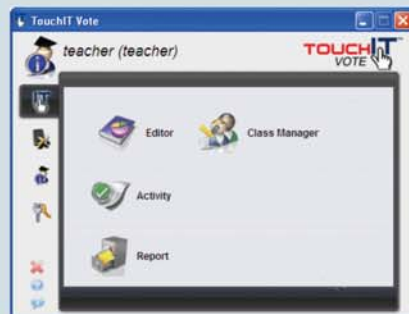

Up to 500 handsets can be simultaneously connected to one receiver making TouchIT Vote suitable for both small and large group activities.

For more information please visit www.touchittechnologies.com

TouchIT Vote Console

From the TouchIT Vote console you can access all the different areas of the software. You can view your reports, manage your classes, run an activity, all from one location.
